exercise 1

a) G(x) has 4 digits

add 4 zeros to M(x):

M'(x) = 1101 0011 1101 0000

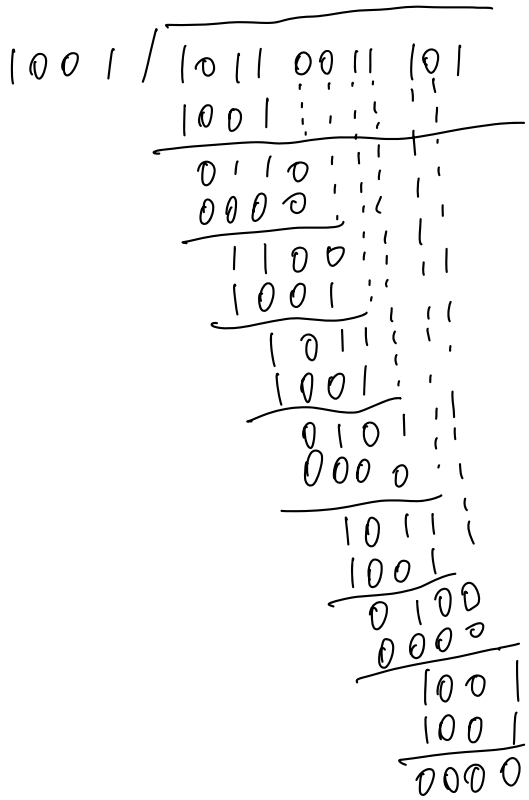

modulo 2 division:

remainder is 0

∴ the transmitted bit string is 1101 0011 1101 0000

b)

remainder is 0, no error occurred.
